Brightgrid Homes

October 2026

STARTER PACKAGE

One part of your home, working as one system.

You already own the smart kit. I connect it, so it works together and you control it from one screen. Two days, one fixed price.

FIXED PRICE

£1,250

using the kit you already own

What you get

- **A home hub** — a small computer that stays in your house and runs the system. Supplied, set up and yours to keep.
- **One area connected**, up to 5 devices you already own.
- **3 automations** built around your day — you choose them.
- **One screen** on your phone for that area, instead of several apps.
- **Handover**: I show you how it works and leave a written summary. The owner account is yours.
- **1 month of Care Plus** included, so small changes and questions are covered while you settle in.

PICK ONE AREA

Heating · Cameras · Energy & plugs · Lighting

Is it right for you?

- You already own **three or more smart devices** — a smart thermostat, cameras, plugs, bulbs, a doorbell.
- They each have their own app and don't talk to each other.
- You'd like to start small and add more later.

Not included

- ○ New devices. If you want a sensor or a plug added, it is priced separately and shown before you agree.
- ○ New wiring or electrical work.
- ○ Camera AI recognition (people, vehicles) — available as an add-on.
- ○ More than one area. That is a full installation, quoted after a home check.

How it works

1. **Home check.** I look at what you have and tell you what can be connected reliably. Free within an hour's drive of Grays, Essex.
2. **You choose** the area and the three automations.
3. **Two days of work**, then the handover.

Worth knowing

Not every device can be connected reliably. I check first and tell you before you commit to anything.

Your devices keep working from their own apps and switches, as they do now, even if the hub is unplugged.

No subscription is needed for the system to run. After the first month, a support plan is optional. Care plans run with Home Assistant Link (about £7.80/month, paid to Nabu Casa in your own account).

Start with a home check

Email **hello@brightgridhomes.co.uk** or call 07447 871187, and tell me what you already have. — Tomas

brightgridhomes.co.uk

We don't install panels or batteries — we connect the equipment you already have into one system you control, with no subscription needed (support plans optional) and your data kept in your own home.
